Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: MUFFLER WITH DRAIN SYSTEM.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 – 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshimura et al. (JP 58202323).

With respect to claim 1, Yoshimura teach a muffler (Fig.1) comprising a sound-absorbing structure having a gas introduced from a gas source; and an outlet (Fig.1, Item 11) defined by the sound-absorbing structure for discharging a drain separated from the gas (Abstract).

With respect to claims 2 – 6 and 8, the Examiner considers that Yoshimura teaches the limitations described in the claims (Fig.1; Abstract).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshimura et al. (JP 58202323) in view of Bourne (US 1,821,688).

Yoshimura et al. teach the limitations discussed in a previous rejection, but fail to disclose wherein the second hole is located at a lower half portion of the partition in a vertical direction.

Nevertheless, Bourne teaches a muffler comprising a plurality of partitions (Fig.1, Items 12 and 13) wherein a hole (Fig.1, Items 14 and 15) is located at a lower half portion of the partitions in a vertical direction.

It would have been obvious to a person with ordinary skill in the art at the time of the invention was made to employ the Bourne hole configuration with the Yoshimura et al. design because the hole would permit the drainage of bottom water/moisture/condensate from the muffler when use in an horizontal application, as disclosed by Bourne (Col.3, Lines 48 – 63).

Conclusion

4. The attached hereto PTO Form 892 lists prior art made of record that the Examiner considered it pertinent to applicant's disclosure.
